

SPELLBOUND

It all began as the dream of a knowledgeable yachtsman. The dream was to create the most functional and spacious yacht that would be practical for a husband and wife team to own and operate; employing additional crew only as an occasional convenience.

SPELLBOUND

***Spacious,
comfortable,
and practical...
without compromise.***

Every system essential to comfortable operation - power train, electricity, water, air-conditioning and heads - is redundant. If a system fails, a few valves or switches can be repositioned, and function resumes. Entertaining family, friends and clients dictated the need

for functionally elegant living areas. An active lifestyle required adequate storage for fishing tackle, SCUBA compressor, dive gear and other equipment, plus safe and easy access to the water. Staterooms must be spacious, comfortable and without compromise.

SPELLBOUND is the realization of that dream. Utilizing a proven hull design and propulsion system, state-of-the-art communication, navigation and monitoring systems were installed, creating a safe, reliable and easy to operate vessel, into which

all of the comforts and conveniences of home (and office) could be fitted. A complete assessment of priorities, careful space planning, and elegant yet practical interior decorating have led, finally, to a yacht that is as functional as she is beautiful.

Design considerations: the yacht must be self-sufficient for extended periods of out-island cruising. In order to afford the busy owner a realistic chance of sustained cruising, the yacht must be able to stay in contact with the office, in fact must be able to function as the office. In order to be safely operated by

a minimum crew, the most modern navigation and communication systems would be required. The ability to monitor the yacht's systems as well as her position and forward progress, from several remote locations, would be important. Safety and reliability were to be paramount.

SPECIFICATIONS:

Aluminum Motor Yacht
 Length: 75' • Beam: 17' 6"
 Draft: 5'
 Builder: Palm Beach Roamer
 Refit: 1989 - 92
 Engines: Twin GM 12V71-TI
 Generators: Westerbeke 25 & 20kw
 Fuel: 1800 Gal.
 Water: 250 Gal. ; Sea Recovery
 50 GPH Watermaker
 Speed: 20 Kts. • Cruise: 17.5 Kts.

PARTIAL EQUIPMENT LISTING

Radar • Autopilot • Laser Plot • VHF •
 SSB • (2) GPS • Loran C • Cellular
 Phone • 35 HP Bow Thruster

This abbreviated list of equipment represents some of the improvements SPELLBOUND underwent during her keel-up total refit. The objective was to create a totally new yacht that would be a practical owner operated vessel of minimum maintenance, requiring crew only as a convenience.
